

PEDESTRIAN PROTECTION

YOUR CAR TAKES CARE OF MORE THAN JUST YOUR SAFETY

YOUR GLOBAL MOBILITY ENGINEERING EXPERTS

Pedestrian protection not only takes place in a laboratory: it needs to prove its worth on the roads. Therefore, our aim is to develop the best possible protection for both vehicle and road users.

We are concerned with active safety, i.e. collision avoidance through the development of driver assistance systems, and also with validating the systems to ensure that they comply with legal requirements and protocols.
